## Schedule a Tour

We recognize that few decisions in life are more complex or emotionally charged than placing a loved one in a skilled nursing center. We will do everything we can to make you as informed as possible.

Please contact our admissions department to schedule a personal tour or to answer any questions you might have.

*Where Care Matters!*

The Rehabilitation Center of Los Angeles is able to accommodate admissions 24-hours a day, 7 days a week including holidays.

Our facility is Medicare certified and we accept a wide variety of insurance plans.

  
THE REHABILITATION CENTER OF  
**LOS ANGELES**

340 S. Alvarado Street  
Los Angeles, CA 90057  
T: 213.484.9730 | F: 213.484.9507  
[www.rehabcenterofla.com](http://www.rehabcenterofla.com)

Our goal is to return each patient to his or her highest level of function.

## 24-Hour Skilled Nursing Care

Your attending physician directs the care through our nursing and rehabilitation staff. Nursing services that are provided but not limited to, are:

- Infusion therapy, including antibiotics, TPN and pain management
- Wound care management
- Post-surgical complications
- 24-hour RN, LVN, RNA, CNA supervision
- Diabetic management
- Congestive heart failure management (CHF)

## Personalized Therapy Programs

Our experienced therapists work as part of the interdisciplinary team to develop patient specific programs. Therapeutic services provided but not limited to, are:

- Post orthopedic recovery
- Neurological rehabilitation, including stroke recovery, multiple sclerosis, Parkinson's Disease
- Cardiac recovery
- General weakness
- Pulmonary rehabilitation, including CPAP/BIPAP, Chronic Obstructive Pulmonary Disease
- Dysphagia program
- Multiple trauma rehabilitation

## Clinically Complex Unit and Subacute Unit

Our 50-bed dedicated CCU and subacute unit is staffed with a team of skilled professionals who understand the unique needs of respiratory patients. Programs include:

- Ventilator Weaning
- Speaking Valve
- Chest Physiotherapy

*Subacute care differs from that of a traditional nursing facility in that it provides more intensive care to the patient until the condition is stabilized.*
